Python Data Engineer with nearly 4 years at lobstr.io running a fleet of 21 production web scrapers — built 10+ of them — collecting ~786K records/week into a shared PostgreSQL warehouse, with deep hands-on experience bypassing enterprise anti-bot protection (Akamai, DataDome, PerimeterX). Rigorous about data quality and trusted to run production pipelines that must not fail.

Work Experience

Python Data Engineer at **LOBSTR.IO**, France (Remote)

Oct 2022 – Jul 2026

- **Built 10+ and operated all 21 production web scrapers** across two verticals — 15 French e-pharmacy price-intelligence modules and 6 luxury watch/jewelry brand scrapers (Chanel, Omega, Patek Philippe, Audemars Piguet, Breitling, Boucheron) — continuously adapting them to site redesigns and evolving anti-bot defences.
- **Collected ~786K price/availability records per week across ~1,955 retailer subdomains** into a shared PostgreSQL warehouse; scaled marketplace modules to thousands of storefronts each (Leclerc Drive 1,265, LeaderSanté 553).
- **Bypassed enterprise anti-bot protection** (Akamai, DataDome, PerimeterX) by integrating and operating bypass services, proxy/IP rotation, and CAPTCHA solvers inside scraper modules; led migration from a third-party provider to a **self-hosted anti-bot engine** with a pluggable provider-fallback router.
- **Ran daily data-quality monitoring:** price-drift detection, historical-gap analysis, anomaly detection, and dataset merge validation, so clients always received trustworthy data.
- **Operated the collection platform** (Celery, RabbitMQ, pm2, PostgreSQL/SQLAlchemy on Google Cloud & AWS S3) and built ops tooling — incl. a watchdog auto-recovering stalled scraping workers.

Junior IT Executive at **WSDA New Zealand**, Dhaka (Onsite)

Aug 2022 – Oct 2022

- **Collected, validated and managed data** supporting business development and decision-making.

Education

B.Sc. in Computer Science and Engineering, CGPA 3.12/4.00
University of Rajshahi (Rangpur Engineering College)

2017 – 2022

H.S.C. in Science, GPA 4.88/5.00
Devi Chowdhurani Degree College, Rangpur

2015 – 2016

Skills

- **Programming:** Python (Advanced), SQL, JavaScript, Regex
- **Web Crawling:** Requests, lxml, BeautifulSoup, Scrapy, anti-bot bypass (Akamai, DataDome, PerimeterX, CAPTCHA-solving services), proxy/IP rotation, JavaScript-rendered sites, structured-data extraction (JSON-LD, __NEXT_DATA__)
- **Data & Cloud:** SQLAlchemy, PostgreSQL, MySQL, Celery, RabbitMQ, pm2, Google Cloud, AWS S3, Git, Linux (Ubuntu/WSL2)
- **Other:** ETL pipelines, data-quality assurance, problem-solving

Related Projects

bazarlens — Price Intelligence Pipeline

github.com/mahfujars/bazarlens

woob, PostgreSQL, dbt, Airflow, FastAPI, Docker — multi-marketplace price-intelligence pipeline over StarTech & Daraz; resumable per-category crawls with period-keyed price snapshots, price-drop detection, proxy rotation against soft anti-bot, and an analytics dashboard; Airflow fans crawls out per category.

Aroga Web Crawler

github.com/mahfujars/arogga

Celery, SQLAlchemy, PostgreSQL, Requests, lxml — scraped and cleaned product data (name, SKU, price) across all categories; parallel tasks via Celery; handled pagination, rate limits, and 404s.

Sia.Ch Web Crawler (interview test at lobstr.io)

github.com/mahfujars/sia

SQLAlchemy, MySQL, Requests, lxml — scraped member & office data from the Swiss engineers' registry; decrypted AES-encrypted phone numbers; handled pagination, rate limits, and 404s.

Achievements & Activities

- **Contestant** — The 2019 ACM-ICPC Asia Dhaka Regional Contest (onsite) · [certificate](#)
- **Top Earner** — Web Design & Development, LEDP Project 2020, ICT Division · [certificate](#)
- **Assistant Country Director** — International Youth Summit · **Campus Ambassador** — ICT Olympiad Bangladesh
- **References:** experience certificate & letter of recommendation from lobstr.io founder — available on request.
